EDUCATION

Sri Manakula Vinayagar Engineering College

Bachelor of Technology in Computer Science and Engineering

Nov. 2021 – May 2025

CGPA: 7.51

EXPERIENCE

Information Solutions Graduate Engineer Trainee

Sep 2025 – Dec 2025

Barry-Wehmiller Design Group

Chennai, IN

- Developed and configured SCADA applications using Inductive Automation Ignition (Vision and Perspective) for industrial automation systems.
- Contributed to EPMS for a hyperscale data center by creating tags, elevation screens, and panel modifications.
- Designed SQL schemas and stored procedures for system improvements.
- Migrated systems from FactoryTalk View to Ignition Vision with feature enhancements.
- Used Python scripting, SQL, Docker, and Git for development and version control.

Embedded System Developer Virtual Intern

Jan. 2024 – Mar. 2024

Microchip Technology Inc.

- Completed internship in embedded systems and IoT development.
- Learned PIC16 microcontroller architecture, low-level programming, and real-time system design.
- Implemented callbacks, linked lists, and state machines in embedded applications.
- Gained hands-on experience with MPLAB X IDE and dsPIC motor control.
- Worked with BLE communication and sensor node development for Azure IoT Central.

PROJECTS

Stu3lock | *Python, Flask, SQL, HTML, CSS, JS, Solidity, Ganache*

- Built a decentralized student forum using Solidity smart contracts, ensuring secure, tamper-resistant discussions and data integrity.
- Designed role-based access control and forum workflows using a combination of on-chain smart contracts and off-chain database logic for scalable user management.
- Integrated Web3 authentication with MetaMask using Web3.js, providing wallet-based login and authorization.
- Implemented NFT-based identity verification to ensure real users and reduce spam and bot activity.

Custom Neovim Setup | *Neovim, Lua, Vim, Git*

- Built a minimal, high-performance Neovim environment using Lua-based configuration for Python and Java development.
- Optimized editor startup by implementing lazy-loaded plugins, reducing configuration load time by ~40%.
- Customized key mappings, LSP integration, and debugging workflows to improve developer productivity.

TECHNICAL SKILLS

Languages: Python, Go, SQL, Bash

Frameworks: Flask, FastAPI

Developer Tools: Git, GitHub Actions, Docker, AWS, Linux, VS Code, Neovim

Databases: MySQL, PostgreSQL

Libraries: Pandas, NumPy, Matplotlib, Seaborn

CERTIFICATES

Data Engineering – AWS Academy Graduate (In Progress)

Joy of Computing Using Python – NPTEL

Programming in Java – NPTEL

ABOUT ME

Aspiring computer science graduate interested in backend, cloud, and DevOps, with a focus on building well-engineered, scalable software systems. Enjoys collaborating with teams, learning from experienced professionals, and applying new skills to real-world projects.
